

FIREBLOCK

FFG

FIREBLOCK FFG FIRE EXTINGUISHERS is an advancement on the current CLASS A Fire Extinguishers. The reason for this is that a FFG Fire Extinguisher is filled with a super cooling gel that is easy to spray, non-toxic and environmentally friendly product that when used, **stops the fire quickly, cooling down the fire and prevents it from reigniting.**

WHILST FIGHTING FIRES ONLY ONE POINT OF THE FIRE TRIANGLE NEEDS TO BE REMOVED, HOWEVER FIREBLOCK FFG REMOVES ALL THREE POINTS CONCURRENTLY.

IT IS NON-TOXIC AND ENVIRONMENTALLY FRIENDLY

FIREBLOCK FFG is a ground breaking technology that can be used on all Class A fires and electrical fires up to a 1000 volts.

FIREBLOCK FFG performs extremely well in cooling down burning truck tyres and break systems.

FIREBLOCK FFG is very efficient in extinguishing and cooling down burning rubber like tyres and conveyor belt systems.

FIREBLOCK FFG is extremely **successful in Fire suppression systems**, the product **does not separate** once mixed and can **last up to three years in a tank**. The use of FFG in fire suppression systems has a high knock down power, has great cooling characteristics and reduces the risk of reignition.
